EIPM Workshop
Digital Transformation
in Procurement

At the EIPM Archamps Campus, France.

WORKSHOP FOCUS:

With the aid of new technology and data-driven decision making, Procurement has improved efficiency, advanced supplier interaction and improved cross-functional collaboration with R&D, Sales, Production and other internal departments.

During this workshop, we'll explore, among other topics:

- ✓ Digitalization in Procurement – bringing value to customers
- ✓ Reading early warning signals from Suppliers
- ✓ De-risking the Supply Chain beyond Tier 1 Suppliers
- ✓ New Skills for procurement professionals

EIPM Workshop
Digital Transformation in Procurement
14 September – Archamps, France

In the coming years, the entities which embrace Digital Transformation will have a significant advantage in providing greater Customer Value.

Needless to say, Procurement will remain one of the core partners and will be considered the forerunner in this transformation.

Digital Transformation

The exponential speed of digital transformation is having a great impact on industries across all domains. This gives rise to the collection of huge amounts of data that can be studied, patterned and automated, driving Decision Making.

What about Procurement?

When we talk about Technology and Digital Transformation in Procurement, a lot of the work is being done by machines with phenomenal accuracy. New digital tools are allowing professionals to automatically optimize inventory, to prequalify suppliers in rapid time and to automate price-benchmarking, among other uses.

Speakers

Virginie Vast – Vodafone Procurement Company
Bengt Isaksson – Ericsson
Michael Chatterton – Novartis Procurement
Manish Shanbhag – EIPM India Director
