Objectives

- **Develop generative AI expertise within procurement teams:** Launch a training path that enables fosters the Curiosity of professionals who will fully embrace the power of GenAI through structured experimentation (**Curiosity**).
- **Increase awareness of GenAI limits:** Equip your teams with the most vital GenAI skill: **Critical Thinking**.
- **Generate training-ready prompts:** Create resources that will help train future onboarding (**Capitalisation**).
- **Build a community of experts:** Building an internal community of practice around AI in procurement that shares knowledge and best practices.

Programme

1. Discovery

First steps :

- Introduction to **AI fundamentals**.
- Presentation of the 3C framework (**Curiosity**, **Critical Thinking**, **Capitalisation**).

Learning and practising “Prompting”

- Master the art of giving precise instructions to GenAI in order to instantly obtain relevant and high-performing results.
- Complete practical exercises to strengthen prompting skills.

Concrete procurement use cases:

- Apply the acquired skills to job-specific scenarios, such as drafting specifications, conducting a market research or a supplier risk analysis.

Presentation of the contest:

- Explication du format et des règles du "Promptathon", une compétition ludique où les participants s'affrontent pour créer les prompts les plus performants.

2. Application

- After testing their prompts autonomously participants **share and refine** prompts under the guidance of EIPM facilitators.
- **Collaborative exchange among peers to learn from each other’s experiences.**
- **Collective improvement of techniques.**

3. Capitalisation

- **Celebration of achievements:** Highlighting the most effective prompts.
- **Generate training-ready prompts:** Create resources that will help train future onboarding
- **Reflection on adoption:** Support participants in order to leverage the skills and tools discovered during the training in their day-to-day work life.
